

Thuraya Handheld Service. On Land.

Thuraya satellite phones are essential when you need easy-to-use and cost-efficient communications in Europe, most of Africa, the Middle East, Asia and Australia. Especially designed for use in demanding environments, the new Thuraya XT is the only satellite phone that complies with the IEC's (International Electrotechnical Commission) IP54/IK03 standard for being splash and dust resistant, as well as shock-proof.

In addition to combining satellite and GPS technologies, Thuraya handholds provide continuous Internet connectivity at speeds of up to 60 kbps via GmPRS (Geo mobile Packet Radio Service). You can make voice calls, browse the web, send and receive emails, and even access your corporate network, all via the same Thuraya handset.

Key benefits.

- All-in-one phones integrating satellite, GmPRS, GPS and GSM (SG-2520), providing voice, fax, data and SMS messaging.
- Always-on Internet access at speeds of up to 60 kbps.
- Light and compact handsets.
- Cost efficient satellite communications and budgetary control with Thuraya's prepaid service.
- Compress email, faxes and SMS by up to 90% with Vizada's SkyFile® Mail.
- Control and monitor Thuraya SIM cards using The Source®, Vizada's web-based account management system.

Business applications.

Thuraya handsets are an ideal solution for professionals on the move such as government and military personnel, journalists, oil and gas workers, mining teams, NGO personnel and anyone working remotely in locations with limited access to traditional terrestrial connectivity. In addition to offering voice, data, fax and GPS the Thuraya GmPRS-enabled handsets deliver access to:

- Web browsing
- Email, webmail
- Content downloading
- File Transfer Protocol (FTP)
- Virtual Private Network (VPN)
- E-commerce

Choose the Thuraya handset for you.

Thuraya SO-2510: at 130 grams, the SO-2510 is the lightest and smallest satellite phone in the industry.

Thuraya SG-2520: this satellite tri-band GSM phone allows you to switch from one network to another depending on your location. Once outside Thuraya's coverage area, the phone will operate on the GSM network within range.

Thuraya XT: with its extremely durable design and its dependable battery up to 6 hours talk time and 80 hours standby time, it is ideally suited for use in tough environments.
